

IN THE SPECIFICATION:

Page 1, after the title and before the first line of the specification, insert the following paragraph:

--The present application is based on International Application PCT/JP2004/012615, filed August 25, 2004, which application is incorporated herein by reference in its entirety.--

IN THE SPECIFICATION:

Page 3, replace the second full paragraph at lines 11-25, amended as follows:

The PC card according to the present invention comprises a printed board mounted with an electronic component, a main cover essentially including a frame and a planar portion for accommodating therein the printed board, a cover member fixed to the main cover and covering the printed board, the main cover having at least one opening formed in the planar portion thereof in opposed relation to the electronic component for prevention of interference with the electronic component, and at least one plate member fixed to close ~~closing~~ the opening of the main cover and ~~fixed to the main cover, wherein~~ to cover a part of the planar portion of the main cover, wherein the main cover has the openings formed collectively in a predetermined region of the planar portion thereof and a recess formed outside the predetermined region, and the plate member has an outer surface of the plate member is located at substantially the same level as an outer surface of the main cover, ~~and~~ the plate member ~~has~~ having a smaller thickness than the planar portion of the main cover.

Page 3, replace the last line, amended as follows:

Further, according to the present invention, ~~where openings are collectively formed in~~

Page 4, replace the first paragraph at lines 1-8, amended as follows:

openings are collectively formed ~~the cover member and the main cover~~ in a predetermined region of the main cover, and recesses are formed in outer surfaces of the cover ~~member and the main cover outside the region formed with the openings~~ in other region than the predetermined region where the openings are formed. Thereby, the recesses formed in the surface portions of the cover member and the main cover ~~without interference~~ which do not interfere with the electronic component can be utilized as a space for application of a label, a memo sheet or the like.
